

Bullseye Dentist Fishing Rod

bullseye

Bullseye

Product number: BE-DA

The Dentist fishing rod series is perfect for medium to heavy pike fishing.

from 305,00 €* 305,00 €

The Bullseye Dentist rod range has been designed for medium to heavy pike fishing.

The Handle

The high quality EVA handle offers a secure grip for casting, baitcasting, striking and drilling! The handle fits perfectly to the ergonomics of the forearm. The high-quality EVA handle looks very elegant and is at the same time incredibly handy and functional. Due to the perfect balance and the feather weight, no counterweights are needed with this model.

The Reel Holder

The Fuji reel seat is very ergonomic in the hand and allows a perfect grip and fatigue-free fishing.

The Guides

We only use Fuji components for this model as well. In this series, we have designed the ringing according to the KR concept in order to achieve maximum casting distances, target accuracy and a perfect distribution of power on the blank. The result is a coherent ringing concept that can be used with any reel and any line.
