

Deps New Slide Swimmer 175 Lure Swimbait

Deps

Product number: DS-NSS-175

High quality swimbait specially designed for big fish hunting.

74,99 €* 74,99 €

The "Slide Swimmer" is a deadly trout lure developed using a completely new manufacturing process based on a concept that differs from all other big lures with a weak wave action and a soft sound. With a sublimated ABS hollow core and a realistic soft shell, this big lure has a unique soft sound and vibration and texture that is as close to reality as possible. When twitched or jerked, the lure responds quickly to rod movement, giving the angler the time and space they need to trigger a bite at the right moment, resulting in a high hit rate. The softshell, which extends further than the front core body, creates a secondary effect by pushing back the rear body through its elasticity. The soft shell has a slight curve that gives it a unique life. Not just realistic, not just soft, the unique features of the "Slide Swimmer" will make your game with big lures even safer.

- Length: 17,5cm
- Weight: 79,4g
- Swimming behaviour: slow sinking
