## NRS Hydroskin Forecast 2.0 Neoprene Gloves 2mm Black

Dive into any adventure, no matter how cold it gets, with the NRS Hydroskin Forecast 2.0 Neoprene Gloves. Designed for adventure anglers and watersports enthusiasts who value dexterity and warmth, these gloves offer a perfect combination of functionality and comfort.

### Features:

Dive into any adventure, no matter how cold it gets, with the NRS Hydroskin Forecast 2.0 Neoprene Gloves. These gloves offer a perfect combination of functionality and comfort for adventure anglers and watersports enthusiasts. The 2 mm HydroSkin neoprene with titanium laminate adhesive provides warmth and protection from the wind while allowing unrestricted freedom of movement. The high-quality nylon-elastane outer material with DWR coating repels water, while the soft, smooth inside offers a comfortable feel against the skin. The convertible fingertips on the thumb and first two fingers make it possible to tie knots, take photos or operate a touchscreen without having to take off the gloves. The silicone palm offers an improved grip on rods, paddles and oars, while Velcro patches keep glove tips out of the way. Thanks to the stretchy cuff and press studs on the wrist, they are easy to put on and stay securely in place.

### Specifications:
