We recognised that one particular piece of technology from the camping industry could be really appreciated in the angling market, in the shape of the impressive Heat Transfer grid on the base of a kettle to make it more efficient.

- Perfect device for making quality coffee or tee outdoor
- 2 sizes: 900ml and 1,5 liter
- Lightweight aluminium construction
- Easy to use and also very easy to clean
- Made from a hard anodised aluminium and features a durable soft touch handle
- Feature Heat Transfer technology that concentrates the flame of your stove on the base of the kettle for a much faster boiling time
- Approx. 33% more efficient than traditional camping kettle thus saving you money!
- Security valve
- Matt black finish
