Zeck Tungsten Nail Sinker - Perfect choice for precise fishing

The **Zeck Tungsten Nail Sinker** is the ideal solution for precisely weighting your soft bait and improving its running behaviour. These slim weights are simply sunk into your soft bait at the desired point and offer you a wide range of possible uses.

Thanks to the high density of the tungsten material, these nail sinkers are particularly compact and almost invisibly integrated into your bait. This makes them particularly effective for inconspicuous fishing. The **Zeck Tungsten Nail Sinker** allow you to optimise your lures for different fishing techniques. Use them to balance your lure for improved running behaviour or for soft jigging, where the lure is moved weightlessly through the water. With the additional weight of **Nail Sinker**, you can target a deeper layer of water.

Features:

- Additional weight for soft bait
- Ideal for soft jerks and balancing
- Penetrates the bait easily
- Provides good hold in the bait
- Material: Tungsten

The **Zeck Tungsten Nail Sinker** is your indispensable tool for precise adjustment of your lures and a successful fishing technique.
