NRS Titanium Co-Pilot Knife

Discover the **NRS Titanium Co-Pilot Knife** - a must-have for any outdoor enthusiast. This high-quality fishing knife combines proven performance with innovative features to give you the safety and functionality you need in any situation.

With its robust titanium blade, this **kayak knife** offers impressive durability and corrosion resistance, making it perfect for use in salty waters. Thanks to its lightweight yet strong construction, it is a reliable companion for your adventures on the water.

The partially serrated edge of the **NRS Co-Pilot Knife** is designed to handle all your cutting needs with ease. Whether you need to carve fish or cut rope, this boat knife is ready for any challenge. The unique "reverse scallop" serration allows for precise and efficient cutting, even in the most adverse conditions.

The practical **Thumbs Up Sheath** provides secure storage for the kayak knife while allowing quick access - ideal for situations where every second counts. With just a flick of the thumb, you have the kayak knife ready to hand when you need it.

Thanks to the all-weather G10 handle with rubberised overlays, the titanium knife lies securely in the hand even in wet conditions. The hand contour of the handle ensures maximum comfort and control, whether you are paddling a kayak or travelling on a sailing boat.

The **NRS Titanium Co-Pilot Knife** was designed with safety in mind. The asymmetrical handle and blunt blade tip ensure a secure grip, while the serrations along the top of the blade prevent the handle from slipping.

With its impressive specifications and thoughtful design, the **NRS Titanium Co-Pilot Knife** is the ultimate tool for all water sports enthusiasts and adventurers. Whether you're fishing, sailing or simply enjoying the great outdoors, this titanium knife won't let you down.
