## Discover the Jenzi Tasty Gums Tungsten beads.

Enhance your fishing experience with the Jenzi Tasty Gums Tungsten round beads. With their unique construction, these beads are perfect for effectively shaping your trout softbaits and targeting running depth. Simply threaded onto the hook in front of your rubber fish, they allow you to flexibly adjust your bait strategy.

### Variety of weights and colours

The Tasty Gums Tungsten beads offer a wide range of weights and colours, so you have the right bead for every situation. Their adaptability makes these beads an essential part of any fishing tackle.

### Tungsten: The environmentally friendly and efficient fishing aid

Tungsten beads are more environmentally friendly than conventional lead weights and have a smaller volume. This combination ensures less water resistance and faster sinking - ideal for longer casting distances when ultra-light spinning for trout.

### Ideal for TASTY GUMS rubber lures and trout hooks

The Tasty Gums Tungsten beads are specially designed to be used in combination with the TASTY GUMS rubber lures and trout hooks. These hooks feature a 45 degree inward bent end of the hook shank that perfectly matches the assembly of the beads. Boost your fishing success with this perfectly matched duo!

## **Multifunctional use**

You can also use the Tungsten Beads for fly fishing and optimise your flies. Use the versatility of these beads to increase your catch rate.

## **Product features at a glance**
