

Hearty Rise Predator WX8 Fishing Line Braided 150m

Hearty Rise

Product number: HR-PX8300

Line for predator fishing and sea fishing

from 49,90 €* 49,90 €

The Predator WX8 high performance line made from UHMWPE fibres (PE) has been developed with the utmost precision and care to meet the requirements of demanding anglers. The fibres are of the latest generation and are manufactured in Japan, where the best fibres in the world are produced. The 8-strand braid achieves high knot strength, which improves the reliability of the line.

The special silicone surface treatment (C/AC) makes the line smoother and quieter, which makes fishing even more effective. However, the line still retains its stiffness and strength to handle even the biggest fish. The smooth surface also minimises drag, resulting in a significantly longer casting distance.

The line is also highly abrasion resistant and can withstand the rigours of fishing in both salt and freshwater environments. With its high breaking strain and robustness, it is ideal for inshore predator and marine fishing.

The high-performance line is offered in different diameters and lengths to meet the individual needs and preferences of anglers.
