The 100% fluorocarbon fishing line with the highest breaking strain that has yet been tested by the EFTTA. With production-tuned knot strength as well as many other advantages such as high resistance to abrasion, high density, sensitivity, high feed-back, castability (tippet), durability, and low visibility, the STROFT FC1 is ideal for all angling-leader needs. It can also be used as a main line, regrettably at a price.

Special Features:

- Knot strength
- Breaking strain
- Resistance to abrasion
- Feed Back
