160,00 €* 160,00 €

Discover the Hearty Rise Predator WX8: The ultimate braided fishing line for demanding anglers

High-performance braid made from the best fibres in the world

The **Hearty Rise Predator WX8** sets new standards in the world of fishing lines. Made from the latest generation of ultra-strong UHMWPE (PE) fibres produced in Japan - the Mecca of fibre manufacturing - this line offers unparalleled performance. The 8-strand braid not only guarantees exceptional knot strength, but also reliability that exceeds the expectations of even the most demanding anglers.

Revolutionary silicone surface treatment for silent casting

Thanks to the advanced silicone surface treatment (C/AC), the Hearty Rise Predator WX8 offers unrivalled smoothness and silence when casting. This unique treatment minimises friction and maximises casting distance without compromising on stiffness and strength - ideal for catching big fish.

Unrivalled abrasion resistance for all environments

Whether in salty seas or fresh rivers, the Hearty Rise Predator WX8 demonstrates impressive abrasion resistance in all conditions. Its robustness and high breaking strain make it the first choice for inshore predator and sea angling. Available in various diameters and lengths, it can be perfectly customised to the individual needs of every angler.

Your advantages at a glance

- **High-performance UHMWPE fibres:** For maximum strength and reliability.
- **8-strand braid:** Guarantees high knot strength.
- **Silicone surface treatment:** For silent casting and greater casting distance.
- **Excellent abrasion resistance:** Ideal for salt and fresh water.
- **Wide range of applications:** Perfect for predator and sea fishing.

Choose Hearty Rise Predator WX8 now - the braided line that will revolutionise your fishing adventures and help you land the biggest fish with ease.
