

# Delphin Erax Fly Fishing Reel

Delphin

Product number: DLP-FRE

Perfect choice for demanding fly fishermen - reliable and robust.

from 44,99 €\* 44,99 €

## Delphin Erax fly reel - Perfect control and precision for fly fishing

### Superior features for a first-class fishing experience

The Delphin Erax fly reel is a premium full metal fly reel specifically designed to take your fly fishing experience to the next level. Its wide and raised spool on both sides allows for optimal placement of the ground line, providing outstanding performance.

### Anti-reflective and robust construction

Thanks to the matt black colour of the Delphin Erax fly reel, unwanted reflections are avoided so that you do not frighten the fish in the water. This is a great advantage, especially in clear waters.

### Highly sensitive drag for precise control

An outstanding feature of the Delphin Erax fly reel is the sensitive drag, which is concealed in the reel body. This design makes the drag insensitive to sand and other contaminants, which is particularly important when the reel comes into contact with water. The integrated Perc system prevents unwanted unwinding of the line even during fast strokes, avoiding tangles and loss of catch.

### Lightweight and durable

The many openings in the construction of the reel body not only make the Delphin Erax fly reel significantly lighter, but also allow the fly line and backing to dry more quickly. This significantly reduces the risk of damage to the equipment and ensures a longer service life.

### **Available sizes and features**

The Delphin Erax fly reel is available in two sizes: #3/4/5 and #6/7/8, offering flexibility and adaptability to different fishing needs. The reel is black and belongs to the affordable price range, making it excellent value for money. In addition, the reel has a ball bearing that ensures smooth operation.

### **Product features at a glance:**

- **Material:** Full metal
