The blanks have a progressive fast action for accurate casting and clean hook setting. Built from high quality TORAY carbon, each rod has an added X-WRAP of carbon running from butt to tip adding extra power. The balance between power and casting action gives our SKYWARD rods unique handling and control properties that feel great when fishing. Elegant looking rods with ultra-clean design and close attention to detail. FUJI rings. Mixed reel seat in cork, high density EVA and carbon. Series of rods with short handles designed for finesse styles where precision and good rod handling are important. The S-190MH model is also ideal for vertical fishing.
