Gunki

Product number: GU-629XX

Discover this range of tactical spinning rods each with a specific power rating and designed to cover the most technical of tactics.

from 196,99 €* 196,99 €

We have worked hard to perfect the handle design that optimises comfort and feedback from the blank. Each rod is steely, accurate and responsive.

215MH: Can be classed as a power zander rod or a light pike rod depending on what species you are after. Developed for flexibility you can easily swap from one tactic to another- a minnow to a spinnerbait, spinnerbait to a soft bait, soft bait to a Boomer for example. The fast-regular blank casts well. Without doubt one of the most versatile rods in our CHOOTEN CUT range.

228M: Versatile rod suited to boat and bank fishing. Great for working soft baits between 3' and 5'. Optimises bite detection and crisp striking. Power in the butt to handle big fish with authority.

250M: We have developed this rod to fill a gap in our CHOOTEN range. Designed specifically for zander fishing from the bank on bigger lakes and rivers. The blank is superbly balanced and comfortable to fish with. Will handle soft baits from 3' to 5' and jig heads from 3 to 12g. Fast action tip for clean striking with progressive power building down the blank. Top rod for the bank angler!

220MH: Our Team favourite rod designed specifically for targeting big fish on straight retrieves. Perfect for boat angling or wading on smaller venues. Versatile action which lends itself equally to soft baits and plugs. Top rod for targeting zander in flood conditions!
