The Dega Belly-Boat 160 is equipped with everything required to assure successful Belly-Boat angling. Not just its length of 160 cm and its width of 103 cm, but also the diameter of 30 cm provide for a stable and secure position in the water.

The comfortable adjustable seat compliment the device. The three air compartments in the boat and seat as well as the screw open valve add the needed security when angling. An added security feature is the metal stabilizer rod in which the catching straps in the middle of the seat as well as the removable net / compartment wherein a measuring tape is integrated. The Belly-Boat is constructed from strong tear-free PVC rubber-raft material with a 0,7 mm thickness. The boat has a load-capacity of 140 kg, yet with plenty of reserve to spare. An added advantage that other conventional boats do not have is the included attachable paddle. This makes it possible to paddle forwards, similar to a classic rubber raft, without the necessity of using flippers. The Belly Boat also has adequate storage space. Both on the left and on the right side you will find spacious pockets that are securely closeable due to Velcro and security clips, and are removable for transport. To top this off, there is a deep zipper-pocket hidden behind the seat.
