1.345,00 €

1.339,99 €* 1.339,99 €

The STAR Seminole II Inflatable Kayak gives commercial outfitters, camps and rental programs a super stable and user-friendly tandem IK to put smiles on the faces of their customers and making their trip nothing but fun. Not least even for private persons.

- Extra kick, oversized tubes and a wide beam combine to give even the most inexperienced paddler confidence in whitewater.
- STAR inflatable kayaks are built with advanced-formula PVC material using state-of-the-art seam welding technology, resulting in superior abrasion resistance, longevity and air retention at a great value.
- The drop stitch PVC floor insert inflates to a rigid 8-10 psi, giving the paddler a stable and comfortable position above the water.
- Two inflatable thwart seats provide the paddlers with comfortable backrests while making the boat quick to set up, simple to maintain and easy to roll up and store.
- Thwart seats attach with straps through drain holes in the self-bailing floor, allowing you to position them to suit the paddlers.
- Two easy-to-use straps hold the drop-stitch floor insert securely in place.
- Bow and stern handles make the Seminole easy to carry to and from the water.
- Top-quality Leaffield™ C7 valves ensure trouble free inflation and deflation.
- Includes a repair kit.
