With only 60mm, this is the smallest one within the Double Clutch series. In Japan the Double Clutch series belongs to the most successful plugs ever and has already successfully tricked many large predators. The suspending 60SP moves flanking and wobbling, which qualifies this lure for modern presentation techniques like twitching and jerkbaiting as well as for steady retrieving or trolling. Thanks to the patented Silent G.O.S. Balancer System, this lure displays excellent casting characteristics regardless its low own weight.

The Double Clutch 60SP is a real insider tip for overfished waters and did fully convince at our tests, where it performed ultimately successful at catching perch and trout. Equipped with Japanese SaqSas trebles!
