The Arnaud has been in the Illex program for over a decade now and it looks like he will stay there for a long time! Its fan community is still big and he is still one of the absolute bestsellers. Innumerable pikes and perches were and are caught with it. The Arnaud was the first jerk bait designed and tuned by Seiji Kato specifically for Europe. IT has a pronounced rolling action and should be retrieved with variable speed. For twitch and jerk it is perfectly balanced, he literally shoots through the water and mimics a prey fish in panic. A classic that still captivates!
