River2Sea S-Waver 168S Lure Swimbait - The perfect pike bait

The River2Sea S-Waver 168S Lure Swimbait offers the most natural 'dying fish' action in the world. This River2Sea lure is a true masterpiece and perfect for ambitious anglers.

Natural S-action

When retrieved evenly, the River2Sea S-Waver displays its famous, sweeping S-action. If you twitch the River2Sea lure, it glides from side to side and shows a slight tilt during the pauses. This realistic movement makes it irresistible to predatory fish.

Adaptable swimming behaviour

The versatility of the River2Sea S-Waver is impressive. If you hold the rod tip high, the S-Waver swims just below the surface. If you lower the rod tip, it transforms into a shallow-running swimbait. This adaptability allows you to react optimally to different fishing conditions.
