Discover the Illex Dowz Swimmer 220 SF lure: the ultimate hardbait for big fish hunters

A masterpiece of imitation

The **Illex Dowz Swimmer 220 SF lure** is not just a swimbait; it is an artistic imitation of the prey of large predatory fish. With a length of 22.0 cm and a weight of 102.0 g, this three-piece hardbait is specially designed for the ambitious angler who is after trophy fish such as bass, pike and catfish. The exceptional attention to detail, from the gills to the fins, combined with our RT (Real Type) colours, makes it the perfect imitation of a prey fish.

Lifelike swimming movement

The swimming motion of the Dowz Swimmer 220 SF is unique. Cranked in, it glides through the water in a seductive S-curve, while it virtually explodes when jerked. This dynamic movement, together with the large tail section made of elastic material, attracts the biggest predators.

Precision and versatility

With its balanced weighting, the Dowz Swimmer enables precise and long casts, ideal for exploring shallow water zones, weed beds or submerged structures. The depth can be adjusted by the additional eyelet under the mouth for a John Weight, so that you can react flexibly to different fishing situations with the Dowz Swimmer.

Product details:

- **Depth:** 0,1 - 1,3 m
