ZALT 14: The original from Sweden. In Scandinavia, these distinctive artificial lures are traded as real killers and those who study the hit lists of particularly capital catches more detailed, will also find out why. Trolled or casted: The Swedes find the fish! This is how boat and shore anglers get their money's worth. Especially the ZALT can be casted unusually wide, due to its compact form. Especially catchy are these baits, if they are not only retrieved monotonously, but are joked with sensitive jerks.
