Libra Lures Fatty D'Worm 65 - Floating rubber worm with cheese flavour

Experience the surprising effect of the **Libra Lures Fatty D'Worm 65**, a rubber bait that challenges even smaller fish to attack with its eye-catching size and robustness. Versatile in use, this lure produces impressive catching results at both high and low weights. Its smooth movement entices even the fussiest fish and its design effectively prevents snagging in water structure.

This model, which was specially developed for targeting large trout in rivers and lakes, has also proven its worth with other predatory fish such as zander and huchen. Perfectly suited for cold seasons when the fish are less active, the Fatty D'Worm always promises successful fishing days.

The unique design of the Fatty D'Worm with its flexible articulation and thickened tail literally provokes fish to attack. Its movements in the water are unpredictable and create an irresistible attraction for predators, even in stagnant waters.

For optimum results, we recommend using a high-quality rod with a length of 185-220 cm and a casting weight of 1-6 g, which offers both the sensitivity for gentle bites and the power for fighting large fish. A size 2000-3000 reel with precise drag ideally complements the setup. High-quality braided or monofilament lines with a diameter of 0.06-0.08 mm or 0.12-0.16 mm ensure a reliable connection between angler and fish.

Features:

- Suitable for rivers, lakes, ponds, canals and artificial reservoirs.
- Attractant: Cheese - ideal for stagnant waters and medium-sized rivers.
- Weight: 1,68 g
- Target fish: Brown trout, rainbow trout, trout, zander, huchen
- Swimming behaviour: Floating

Immerse yourself in the world **Libra Lures Fatty D'Worm 65** and experience completely new fishing results with this high-quality rubber worm.
