Libra Lures Largo 35 rubber larvae floating cheese - The perfect trout bait

The **Libra Lures Largo 35 rubber larvae** are an exact imitation of an insect pupa and an irresistible weapon for every angler. Developed by Tomasz Podkul, these **Libra Lures rubber larvae** are specially designed for fishing in rivers and stagnant waters to successfully catch rainbow trout and chub. With a tantalising cheese flavour, they attract a variety of fish species and ensure great fishing results, especially in trout areas.

Features of the Libra Lures Largo

- Realistic imitation of an insect pupa
- Flavour: Cheese
- Ideal for brown trout, rainbow trout, barbel, chub, eel, grayling and whitefish
- Perfect for rivers, lakes, ponds and artificial reservoirs
- 10 pieces per pack
- Weight: 2.66g

For an optimal fishing experience, we recommend a powerful rod with a length of 185-220 cm and a casting weight of 1-6 g. This should include a 2000-3000 size reel with precise drag. Use braided line with a diameter of 0.04-0.08 mm or monofilament of 0.10-0.16 mm. This setup not only makes it easier to feel the soft bites, but also makes it easier to catch most fish species. For larger fish, adjust your set accordingly.
