Discover the Lucky Craft iLV 50 - the next generation spin jig.

When it comes to finding the perfect harmony between technology and nature, the **Lucky Craft iLV 50 Cicada Spin Jig** sets new standards. It has been specially designed for passionate anglers looking for a reliable companion during the perch season. Let's take a look at the impressive features of this product:

Speed & Efficiency

This lure stands out for its ability to quickly reach the desired depth, thanks to a special structure that does not require any buoyancy material. With its help, you can effortlessly reach those swimming and suspended perch that are widely scattered in the depths.

Specialised head shape

The head shape of the Lucky Craft iLV has been designed to create an intense vibration that allows for quick detection by perch. This vibration effect, combined with the ability to swim long distances, drastically increases your chances of a successful catch.

Optimal for summer

Summer is the best time to use this lure, especially with a lifting and sinking action that makes it irresistible to perch.

Features:

- High speed to reach the targeted depth

- Structure without buoyancy material
- Specially designed head shape for strong vibration
- Ideal for summer fishing for scattered perch
- Excellent performance even over long distances

Don't miss this opportunity to enhance your fishing experience with the **Lucky Craft iLV 50 Cicada Spin Jig**. With its superior technology and easy handling, it is your reliable partner for every perch fishing trip!
