Discover the Illex Swing Mikey 72: The ultimate swimbait for passionate anglers

The perfect catch with the Illex Swing Mikey 72

The **Illex Swing Mikey 72** sets new standards in the field of swimbait fishing lures. With its innovative three-piece articulated body and finesse lip, this lure offers exceptional performance just below the surface. Its unique body profile, which is modelled on small prey fish such as roach, rudd, bream or even perch and black bass, makes it a must-have for every ambitious angler.

Unique swimming action for irresistible attraction

The Swing Mikey 72's combination of wobbling and rolling creates a fluttering swimming action that creates a frenetic and irresistible attraction for fish. Whether you fish slowly as a wakebait or favour a faster stop-and-go technique, this lure never fails to work. The flat tail area not only enhances the rolling action, but also looks extremely natural underwater.

Additional appeal thanks to innovative features

A special highlight is the eyelet at the tail of the lure, to which a feather or small blade can be attached for added attraction. The **Swing Mikey 72** also produces a deep sound, amplified by the clicking noises of its moving body parts, which attracts the attention of any predatory fish species.

Technical specifications

- **Size:** 7,2 cm
- **Weight:** 9,3 g
- **Swimming behaviour:** Floating
- **Swimming depth:** 0,0 - 0,5 m
