## Delphin Flyrx fly line WF 30m floating - Perfect for precise fly fishing

The **Delphin Flyrx Fly Line WF (Weight Forward) 30m floating** is the ideal choice for anglers who want to succeed in the supreme discipline of fishing. Developed with years of experience, this fly line offers outstanding properties at an affordable price.

### Features of the Delphin Flyrx fly line

- **Floating and versatile:** The fly line floats on the water surface and is perfect for use in flowing and still waters.
- **Tapered design:** A tapered side ensures a stronger load in the front section and enables longer, more precise casts.
- **Smooth surface:** Minimises friction in the guides and improves casting performance and the fight against larger fish.
- **Durable and long-lasting:** The hard-wearing surface ensures a long service life for the line.
- **Low memory:** Guarantees perfect contact with the bait and excellent bite detection.
- **Natural colour:** The olive green colour camouflages the line in the water and does not distract the fish.
- **Different weight classes:** Available in five weight classes (from WF-3 to WF-7), suitable for different fishing techniques and water types.

### Advantages of the Delphin Flyrx fly line

This all-round casting line is suitable for both beginners and professional fly fishermen. Lower weights (WF-

3-F and WF-4-F) are ideal for dry and wet fly fishing on smaller rivers. Higher weights (WF-5-F, WF-6-F and WF-7-F) are ideal for fishing on lakes or for predator fishing with streamers and poppers. The line enables you to bring your fly directly to the fish effortlessly and precisely.
