

# Bullseye Run and Gun Close Combat Spinning Rod 2,60m 15-60g

**bullseye**

Bullseye

Product number: BE-RGCC

Run&Gun Close Combat S 260 15-60g is a versatile pike rod.

Weight: 0.152 kg  
269,00 €\* 269,00 €

Run & Gun!! This is the motto of Herbert Ziereis, with whom we jointly designed this rod series. Over a period of about 2 years, we developed our own rod concept together, which bears his signature and his name.

## The Blank:

The core of every fishing rod is the blank. In this case, we have spent a long time working on the perfect blank for the Run&Gun Close Combat S 260 15-60g. The unpolished blank convinces in its inimitable action as well as in its design. The blank measures 260cm in length, has a casting weight of 15-60g and is two-piece. The length of the rod is a clear advantage when fishing from the shore and boat, especially for landing fish, this rod is perfect. With an X-Fast action, the rod has a clear tip action that then seamlessly transitions to a powerful backbone that never loses its dynamism and still works well under full load to keep the upper hand in the hot phase of the drill of a capital fish and land the fish safely. The bite detection is phenomenal on this rod and the strike is more of an automatic reflex after the crystal clear transmission of the bite.

## The Handle

The high quality EVA handle offers a secure grip for casting, baitcasting, striking and drilling. The slightly longer handle allows all types of lures to be guided perfectly. The split grip with a beautiful natural cork at the end is also a feast for the eyes.

## The Reel Holder

The Fuji VSS 16 reel seat is very ergonomic in the hand and allows a perfect grip and fatigue-free fishing.

## **The Guides**

In this model we also use Fuji components exclusively, in this case the rod is equipped with 8+1 Fuji K SS Alconite guides. In this model, we have designed the ringing according to the KR concept in order to achieve maximum casting distances, target accuracy and a perfect distribution of power on the blank. The result is a coherent ringing concept that can be used with any reel and any line.

- Length: 260cm
- Casting Weight: 15-60g
- Transport Length: 135cm
- Guides: Fuji K SS Alconite 8+1
- Reel Holder: Fuji VSS 16
- Blank: 40T Toray unground
- Weight: 152g
- Features: Hook eye
