Hybrida

Product number: HYB-K3T

Twitchbait for shallow waters.

No matter if pike, big bass or catfish - all predators love it!

With its high-backed shape, the K-3 creates a unique silhouette of pressure that drives predators crazy. The ultimate sensory overload through optics and pressure wave. The depth of the K-3 is perfectly designed for shallow-water fishing. Again, it says: crank and catch! Are the robbers bitchy, make short stops and twitch it afterwards. This will make bite slacks history.
