## Illex Blast Bone Jr 150 SF lure - The ultimate hardbait for demanding anglers

The Illex Blast Bone Jr 150 SF lure is the perfect choice for keen anglers looking for a high-quality and versatile hardbait. This lure is a further development of the well-known Flat Bone Clicker Junior and comes with numerous improvements that will enrich your fishing experience.

### Features of the Illex Blast Bone Jr 150 SF lure

The Blast Bone Jr 150 SF is a floating lure with a specially designed lip that ensures it stays just below the surface of the water. Its flat flanks, which are divided into two segments, produce clear clicking noises when moving, which attract fish. A special highlight is the elastomer tail, which displaces more water when retrieving and offers greater manoeuvrability during pauses. This makes it easy to entice even resistant fish to bite by gently shaking the line.

### Versatile application possibilities

The Blast Bone Jr 150 SF can be fished 'walking the dog' style, allowing the lure to be held in a specific target zone for long periods of time - ideal for fishing in weed beds, next to structure or in holes. Its rolling swimming action and ability to displace a lot of water make it perfect for European pike, black bass and largemouth bass anglers. Whether in small ponds or large lakes, this lure shows its strengths everywhere. By adding a John Weight, the weight of the lure can be adjusted to change from a floating model to a slow or fast sinking model, making it particularly versatile and adaptable to different fishing conditions.

## Technical data

- **Target fish:** zander, pike, perch
- **Length:** 15 cm
- **Weight:** 26 g
- **Swimming behaviour:** Floating
- **Swimming depth:** 0,0 - 0,3 m
