Discover the Illex Swing Mikey 115 Swimbait lure: your secret to successful fishing

A masterpiece of seduction under the water surface

The **Illex Swing Mikey 115 Swimbait** is an innovative artificial bait highlight that has been specially developed for anglers who are looking for the extraordinary. With its three-part articulated body and subtle lip for fishing just below the surface, this lure offers an attraction that predators cannot ignore.

Natural imitation for maximum effect

Its unique body profile perfectly imitates the shape of a small prey fish - from roach and rudd to small bream or carp. Small perch and black bass recognise the Swing Mikey 115 as easy prey.

Unique swimming motion

The combination of wobbling and rolling creates a fluttering swimming movement that exerts a frenetic attraction on predatory fish, especially when guided slowly as a wakebait or with faster stop-and-go movements. The flat tail area supports this rolling movement and gives the lure an extremely natural look.

Additional attraction

Additional attraction is provided by an eyelet at the rear of the lure to which a feather or small blade can be attached to further increase the attention of the target fish.

Product specifications

- **Size:** 11,5 cm
- **Weight:** 28,5 g
