

NRS Inflatable Kayak Star Viper

NRS

Product number: NRS-STRVPR

Premium inflatable kayak with a huge cockpit.

1.189,99 €* 1.189,99 €

The STAR Viper Inflatable Kayak delivers hard-shell-like performance with the convenience and ease of an inflatable.

- The Vipers' responsive, high-performance design flies over waves, punches holes, surfs, turns and ferries like no other IK.
- Inflatable bow and stern displacement chambers add flotation to help the Viper resurface quickly in holes while creating a top-deck profile that makes the boat possible to roll.
- The bow and stern flotation chambers also function like a back band and bulkhead, creating a secure and comfortable cockpit for the paddler.
- Included thigh straps lock you in for eddy turns, surfing, bracing, and even rolling.
- The Viper's drop-stitch PVC floor insert inflates to a rigid 8-10 psi giving the paddler a stable and comfortable position above the water.
- STAR inflatable kayakers are built with advanced-formula PVC material using state-of-the-art seam welding technology, resulting in superior abrasion resistance, longevity and air retention.
- Multiple D-rings on the bow and stern decks for rigging gear.
- Bow and stern handles make the Viper easy to carry to and from the water.
- Top-quality Leaffield™ C7 valves ensure trouble free inflation and deflation.
- Includes carry bag, pump and repair kit.
