## Experience the future of fishing: The Okuma 8K Carp long cast reel

The Okuma 8K Carp long cast reel sets a new standard for large carp reels. With its large diameter spool and Slow Oscillation System, this ultra-rugged carp reel offers incredible casting distances and guarantees unrivalled smooth operation. The large bail arm and spool of the 8K are both made from solid aluminium, ensuring exceptional durability.

The fast, progressive drag system of the carp reel has an impressive drag force of 18kg, making it the ideal companion for hunting big fish in big waters. The 8K's Hydro Block technology ensures maximum corrosion protection by sealing the reel's drag system watertight, while the Cyclonic Flow Rotor technology removes excess moisture from the reel body with a cyclonic airflow.

The stylish black design of the 8K is complemented by a weighted wooden handle knob that rests in a vertical position and is always perfectly aligned. This fishing reel combines innovation, durability and comfort and is perfect for discerning anglers who value quality and performance.

### Features:

- Multi disc brake system with oiled brake discs
- 5+1 stainless steel ball bearings for smooth performance
- Stiff, precision machined aluminium spool for improved casting distance
- Quick Set Anti Reverse bearing for fast reactions
- Precision machined brass gear for durability and reliability
- Corrosion-resistant graphite body for a long service life
- CFR Cyclonic Flow Rotor for efficient moisture removal
- Slow Oscillation system for straight and tighter line wind

- Fast Drag system for quick adjustments while fishing
- Double stainless steel line clip for secure line attachment
- Precise worm shaft transmission system for smooth performance
- Anodised heavy duty all-aluminium bail for increased stability
- Rotor drag system for added protection and durability
- Precision machined aluminium crank arm with wooden knob for comfort and grip
- Hydro Block waterproof brake seal for maximum performance in all conditions
