Hybrida

Product number: HYB-W1T

Nifty, tiny twitchbait for fishing under the surface.

14,90 €* 14,90 €

Experience the perfection of the Hybrid Lure Minnow Twitchbait W1.

Imagine it is evening. You are on the water and the hatchery fish are active in the shallows. Now is the perfect moment to bring your Hybrid Lures Minnow Twitchbait W1 into play. This unique and perfectly balanced lure is your ultimate weapon against perch, zander and asp, which are especially predatory at times like this.

The master class of suspending

The Hybrid W-1 differs from other fishing plugs by its excellent running characteristics. As a so-called "suspender", it is characterised by its ability to remain suspended in the water. This action seduces predatory fish during their hunting phases by simulating an injured prey fish, thus attracting attention.

Why Hybrid Lures Minnow Twitchbait W1?

- **Perfectly balanced:** The Hybrid W-1 Minnow has been designed with great care to achieve an optimal swimming effect.
- **For different fish species:** Its design and behaviour in the water make it a favourite of perch, zander and asp.
- **Suspender property:** The W-1 stays in the water, simulating an injured prey fish and thus attracting predatory fish.

Trust in Hybrida quality

Hybrida, as a renowned manufacturer of artificial lures from Germany, stands for quality and effectiveness. Our products, like the Hybrida W1, are the result of extensive research and practical fishing experience. Catch bigger and more fish with us - try the Hybrida Lures Minnow Twitchbait W1 and experience the difference!
