With the models Jumbo 50 and Jumbo 65 the family around the very successful Trout Bait Chub softbaits grows.

The Jumbo was also developed in cooperation with Ugis Gross, vice-world champion of the World Predator Classic 2018, and it also fishes like made by a champion: the Jumbo is extremely flexible due to the special, soft rubber compound and the lamella-like body shape, thus imitating in the current or when jigging a small prey fish almost perfect. In addition, the into the material incorporated attractant, in this case garlic, makes this softbait absolutely irresistible to hungry predators.

The small rubbers are simply pulled on a single hook, but unfold their full strength especially as a dropshot variant or with a small jig head.
